

Solar-Powered Cold Storage at Vijayapura, Karnataka:

- Mr. Nagappa Bhovi is a farmer in Bableshtar Taluk, Vijayapura, Karnataka, whose main crop is dry grapes.
- He spends around Rs.10,000-15,000 every month towards transportation and storage. This is the same case with other farmers in that area.
- To minimize these costs and to increase his income he has installed a solar-powered cold storage facility of 5 metric tonne.
- The farmers around this area have also been benefitted by this facility as they can save on transportation for storage.

Impact:

- Increase in income through rent for storage from other farmers.
- Saving in transportation cost.

Cold storage capacity:
5 Metric Ton

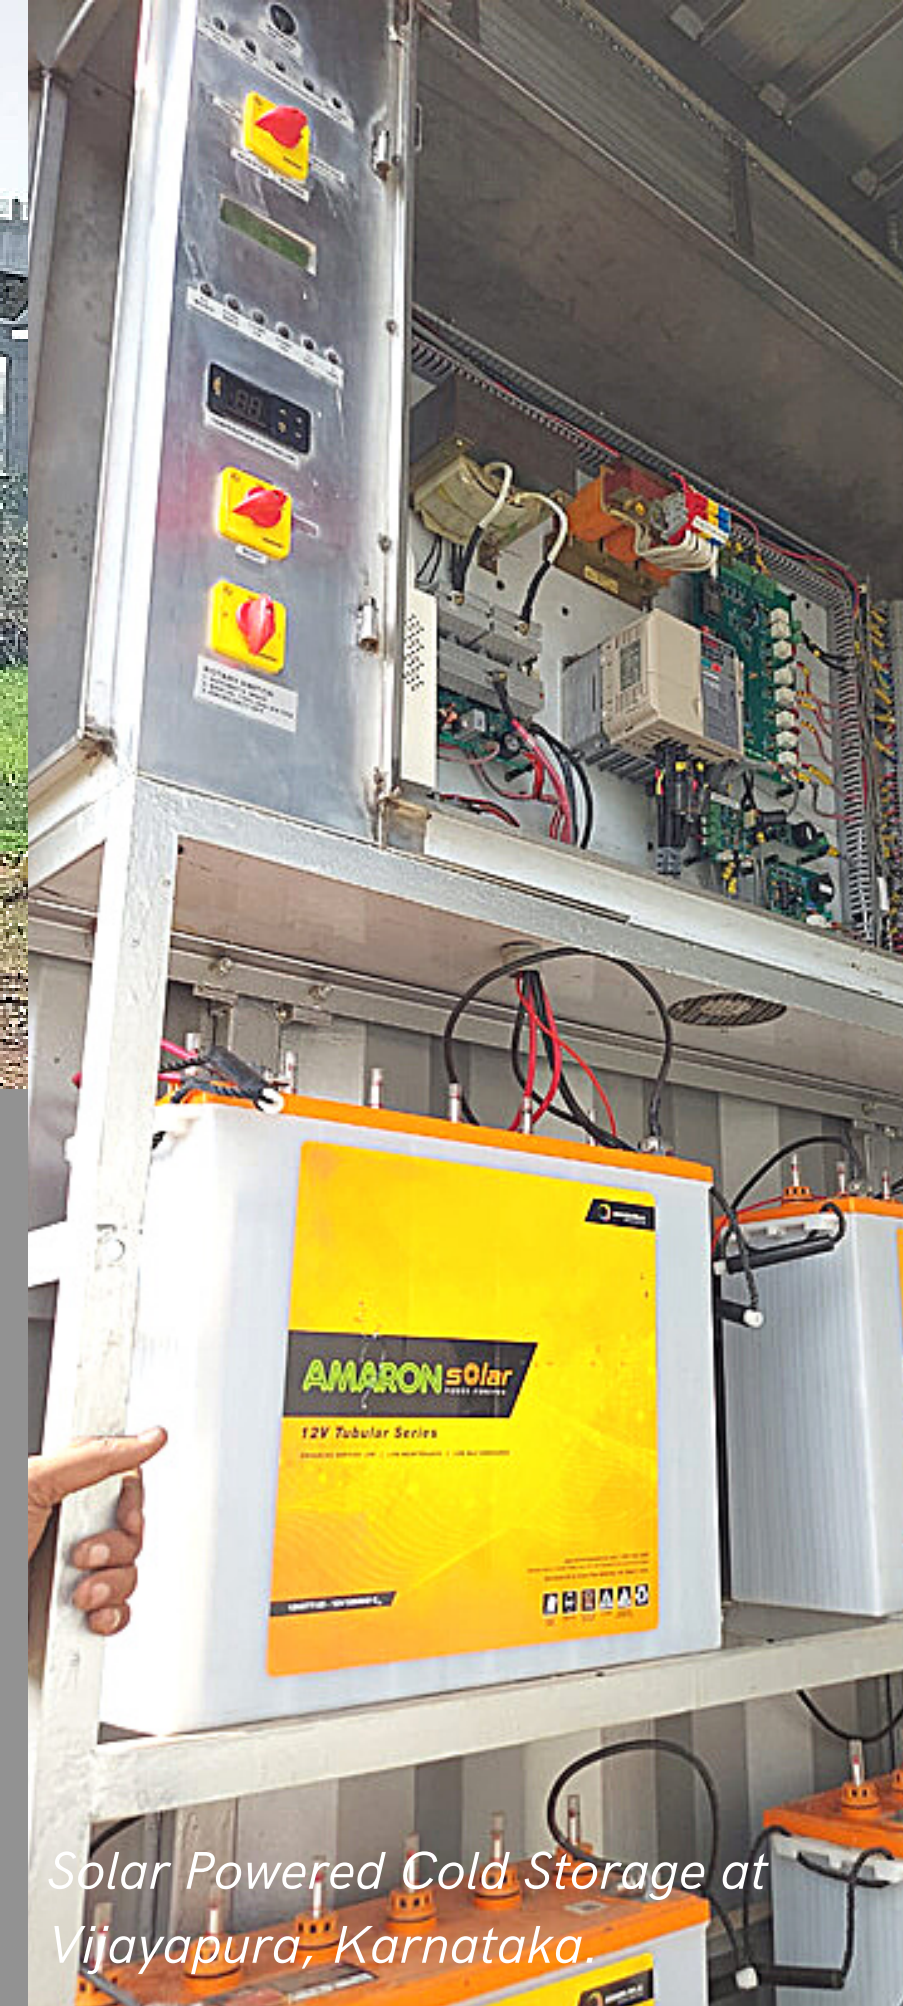

Solar Capacity:
6.3 kWp
